**Animal Toxicology** Tests for DOT Hazard classification  
( Tests Conducted on finely ground silica gel)

1 - hour LC<sub>50</sub> (rat) > 2 mg / l  
48 - hour oral LD<sub>50</sub> (rat) est. > 31,600 mg / kg  
48 - hour dermal LD<sub>50</sub> (rabbit) est. > 2,000 mg / kg  
Considered an ocular irritant

**IARC** Amorphous silica gel IARC - 3 (Unclassifiable as to Carcinogenicity in Humans)

**ACGIH** Cobalt and inorganic compounds, as Co are rated as A3 (confirmed animal carcinogen and unknown relevance to humans).

**IARC** Cobalt and cobalt compounds are rated as Group 2B (possible carcinogens to humans).

**Human Toxicology** Silica gel is a synthetic amorphous silica not to be confused with crystalline silica. Epidemiological studies indicate low potential for adverse health effects. In the activated form, silica gel acts as a desiccant and can cause a drying irritation of the mucous membranes and skin in cases of severe exposure. Multisorb Technologies Inc. knows of no medical conditions that are abnormally aggravated by exposure to silica gel. The primary route of entry is inhalation of dust.

## Section 12 – Ecological Information

Not known to have any adverse effect on the aquatic environment. Silica gel is insoluble and non-toxic.

## Section 13 – Disposal Information

**Disposal Information** If this product as supplied becomes a waste, it does not meet the criteria of a hazardous waste as defined under the Resource Conservation and Recovery Act (RCRA) 40 CFR 261. Materials of a hazardous nature that contact the product during normal use may be retained on the product. The user of the product must identify the hazards associated with the retained material in order to assess the waste disposal options. Dispose according to federal, state and local regulations.
